EDUCATION

2025 – Present	Master of Technology in CSE (Data Science), *Nirma University*	CGPA: **8.21**
2021 – 2025	Bachelors of Technology in Information Technology, *CHARUSAT University*	CGPA: **8.46**
2019 – 2021	Higher Secondary Education, *Shannen School*	Percentage: **80%**
2018 – 2019	Secondary Education, *Jay Jalaram International School*	Percentage: **82.17%**

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, Java, SQL, JavaScript, Scikit-learn, Keras, NumPy, Pandas, Matplotlib, Seaborn, statsmodels.
- **Machine Learning & AI:** Machine Learning (Supervised & Unsupervised), Deep Learning, Natural Language Processing (NLP), Generative AI, Semantic Similarity, Vector Embeddings (sentence-transformers: all-MiniLM-L6-v2), Cosine Similarity, Speech-to-Text Processing (Whisper).
- **Web Technologies & Frameworks:** MERN Stack (MongoDB, Express.js, React.js, Node.js), Streamlit, ASP.NET, HTML, CSS, Bootstrap, REST APIs.
- **Databases & Developer Tools:** MySQL, MongoDB, Git, GitHub.

Experience

- **AI/ML Developer Intern at Kintu Designs** – 01/01/2025 – 30/04/2025
  Contributed to a **GenAI-**based resume analysis system using the Gemini API under technical guidance. Processed resume inputs extracted from PDF/Images and generated vector embeddings using ***sentence-transformers/all-MiniLM-L6-v2*** for semantic analysis. Integrated the solution into a **Streamlit**-based application with **MongoDB** for data storage.
- **Full Stack Web Developer Intern at L & T POWER** – 8/05/2023 – 8/06/2023
  Designed and developed internal **ASP.NET-**based applications for recruitment and assessment workflows. Implemented **UI and backend logic**, handled input validation, and managed structured data storage and retrieval using **MySQL** for company-use systems.

Projects

Sales Forecasting Using SARIMA (Superstore Dataset)

- Prepared daily and monthly sales time series from transactional data.
- Analyzed trend and seasonality using rolling statistics and decomposition.
- Applied log transformation and seasonal differencing to achieve stationarity.
- Built and validated a SARIMA model using ACF/PACF analysis.
- **Technologies**: Python, pandas, NumPy, matplotlib, statsmodels.

AI-Based Resume Screening & Interview System

- Built an AI-powered recruitment system for automated resume screening and interviews.
- Applied cosine similarity with a 60% threshold to match resumes with job descriptions for shortlisting.
- Implemented a voice-based interview flow using Phi-LoRA for question generation and Whisper API for speech-to-text.
- Developed secure HR and candidate portals with Streamlit and MongoDB for data management.
- **Technologies**: Python, Streamlit, MongoDB, NLP, LLMs, Cosine Similarity, Whisper API, Phi-LoRA.

Quiz Web Application

- Developed a quiz application backend to manage questions, submissions, and results.
- Implemented REST APIs using Node.js with MongoDB for persistent data storage.
- Designed quiz logic for user responses, scoring, and result evaluation.
- **Technologies**: MERN stack, JavaScript, REST APIs.

Certifications

NPTEL Courses:

- Problem Solving through Programming in C
- Database Management System
- Operating System Fundamentals
- Fundamentals of Artificial Intelligence

Other Online Courses:

- Exploratory Data Analysis in Power BI
- Data Visualization in Tableau
- Google Data Analytics
